Shade Trees Beautify the Lawn

SHADE TREES NOT PREPAID UNLESS OTHERWISE NOTED

A broad open space of well kept lawn is the first essential of good landscape design, the base against which all else is viewed. Yet it is incomplete without trees to shield the house from the direct heat of the sun, and for ornament. Without trees as a background so the topmost branches extend above and break the roof lines, and a few toward the ends to frame the view, the house appears lost in space.

European White Birch grown as a cluster.

Birch, European White, *Betula alba*

A beautiful, graceful tree of peculiar charm; slender branches, the ends drooping with age, bark chalky white; leaves rather small, triangular, bright light green, yellow in autumn.

Honeysuckle, Bush; Lonicera

Those only acquainted with climbing honeysuckle should plant some of the bush form for their beauty of foliage, profusion of flowers in pairs at the base of the leaves in latter April, and abundant, brilliant berries about the size of a currant, often even more showy than the flowers, in June, when we have few ornamental berries. An excellent specimen shrub and good for screen plantings, because compact in growth, with neat foliage retained late. Of easy culture; suitable for partial shade. Should have sufficient space to develop naturally. Prune if necessary after blooming which, however, reduces the number of berries that year. Most varieties grow 6 to 8 ft. high.

THE SPIREAS

Justly popular for their hardiness, thriftiness, profusion of bloom, graceful habit, neat foliage, and general freedom from serious insects and diseases. The early blooming Spireas, after the bush attains good size, should have some old wood removed to the ground each year immediately after blooming. Prune late, blooms in early spring before growth starts. When neglected for years it may be necessary to prune almost the entire plant to the ground in early spring. They succeed in any moderately moist lawn soil of average fertility.

Keep Gay Color in Your Garden with Hardy Flowers

EFFECTIVE BORDER PLANTINGS ARE CREATED WITH PERENNIALS

Sarcoxie Nurseries' Perennials - - - All Sent Prepaid - - Are Strong Field-Grown Plants

Perennials are an indispensable part of any garden. They supply an abundance of color and charm through the summer months, and are a convenient source of cut flowers for indoor decorations. When planning a formal garden straight lines as followed in the garden as pictured above are preferred, in an informal garden graceful curves should predominate. Perennials give an abundance of bloom the first season and become a definite part of your permanent garden.

Peach Trees

Peaches come into bearing younger than any other tree fruit, under favorable conditions giving a crop the third year and yields are larger as the trees grow older. A few trees won't cost as much as you probably pay for peaches in one year, and none are so delicious as those freshly picked when ripened on the tree. To the man who has room for a commercial orchard, and will cultivate, prune and take care of the trees, peaches offer great opportunities for good profits. A sandy loam or gravelly soil is best, but the peach adapts itself to almost any well drained soil. Sometimes they are planted 18x18, but 25x25, requiring 75 trees per acre, is better.

Production

The most important part of the nursery business is the proper production of the plants we sell. My father, Arthur Wild, a son of Henry N. Wild, one of the founders, has grown up in the business and for years has been in charge of this most important phase of work. Propagation and culture of the plants we sell are under his careful supervision.

Sales

Selling is not difficult when a good product can be offered at a reasonable price, and supplied promptly and properly packed. Our office and packing force is ample and trained to handle your orders quickly. It is easy to order by mail, and to add to your convenience when ordering we have listed most items prepaid to eliminate tedious figuring of postage, and the necessity of frequent adjustments of mailing costs.

You may order with confidence from the SARCOXIE NURSERIES. Our 78 years of service is your additional guarantee.

Our Guarantee

We offer only first grade stock and guarantee every plant we ship to be of first quality, sturdy and free from disease and to reach you in good growing condition.

We exercise care and diligence to have our varieties true to label and sell all our stock with the express guarantee that we will, on proper proof, replace any that may prove otherwise, or refund the amount paid for the same.

In the case of loss, assuming the plants have been promptly and properly planted and watered as conditions require, we will replace at one-half the original purchase price, if reported by July 1st following purchase and your report accompanied with your remittance in the amount of one-half the original purchase price. If stock to be replaced was originally sent you prepaid your replacement will be prepaid, if by express or freight, replacements will be sent transportation charges collect.

Delivery

OUR PRICES ARE PREPAID, except evergreens, large shade trees, fruit trees and other plants too large for parcel post packages. Items marked "not prepaid" are shipped transportation collect. We reserve the privilege of shipping express prepaid where parcel post is impractical. EXPRESS—TRUCK—FREIGHT. Express is generally preferred for long distance for larger orders. Truck freight leaves our plant twice daily, and has proved very satisfactory for shipments. Please tell us how to ship if you have preference.
